

From the Director's Desk MOHIT THUKRAL

Ever since the school premises came alive with vibrancy after an unprecedented long period of inactivity, it has been our endeavour to infuse the school with reputed niche programmes and best practices from across the globe.

It is imperative that we expose the learners of today to multiple opportunities to upskill themselves, spanning from mastering debating skills to creating working models using Artificial Intelligence and Coding. Our vision for the school is to transform it into an energetic learning space and furnish ample possibilities for self-expression to inspire our students to innovate. The AI bootcamp for the middle school was one such event that left an indelible impression on the minds of the students, igniting in them a quest to delve deeper into machine learning.

The academic session so far has been a rich concoction of scholastic rigour, co-curricular activities, interschool competitions, celebration of special events and introduction of many reputed and need of the hour add-ons to the curriculum such as the Shin Experiential Learning Programme, Raz plus International Reading programme, Coding, Financial Literacy, Art Pursuit, Club Activities, Socio-Emotional Literacy and more. The infrastructure is constantly being augmented to accommodate multifarious activities. For students desirous of pursuing contemporary sports like 'Shooting', a new facility will be available in the school premises shortly.

As we step into the second term, successive months will be awash with annual presentations and robust academic activities. After all, if we are to successfully steer our children into the world of tomorrow, we need to give them education that builds their competencies for it.

"Do not train a child to learn by force or harshness; but direct them to it by what amuses their minds, so that you may be better able to discover with accuracy the peculiar bent of the genius of each." – Plato

From the Principal's Desk NIKITA TOMAR MANN

The new academic session has been a gratifying one so far. It fills my heart to watch the children back at school, pursuing multifarious interests and learning from one another through collaborative activities.

This year, the challenge for the educators has been the varying levels of 'Learning Outcomes' that each child came to school with. It is our mission to ensure that all our students are equipped with the skills and knowledge for smooth sailing to the next class. It was refreshing to see our boys and girls at their gleeful best on the sports field, an aspect of their life which they were pining for during the past two years.

To ameliorate the academic rigour, new elements were appended to the curriculum to encompass creativity and critical thinking. The quote, "I never teach my pupils, I only provide the conditions in which they can learn" by Albert Einstein, echoes my sentiments. 'Experiential Learning' is the cornerstone of education at IPGS, where activities, excursions and trips are woven into the annual planner. It is rightly said, eventually, we learn by example and by direct experiences because there are limits to the adequacy of verbal instruction.

There is no denying the importance of academics on intellectual growth. However, we tend to undermine the importance of extra-curricular activities, whereas, it is these that essentially transform the personality of students by enhancing their social skills, confidence and self-esteem, thereby leaving a positive impact on their mental health and well-being. As adults, it is incumbent upon us to encourage our children to engage in all kinds of co-curricular activities, as very often it is during this process that children stumble upon their interests and calling.

"Superior performance is not, never has been, nor will it ever be, the by-product of ordinary efforts." – Gary Ryan Blair
